- Programming Languages: JavaScript, TypeScript, Python, HTML, CSS
- Libraries & Frameworks: React, Next.js, Node.js, Express.js, Tailwind CSS

Experience

Gained exposure to **JavaScript** in both browser-based programming and experimenting with **Node.js** for server-side development.

Practiced **asynchronous programming** (Promises, async/await, callbacks) while learning how the **event loop** and execution lifecycle work.

Explored working with **APIs**, making HTTP requests, and handling **JSON data**.

Applied basic **object-oriented** and **functional programming** concepts to improve code readability and reusability.

Introduced myself to **data structures** (arrays, objects, maps, sets) and basic algorithms for problem-solving.

Experimented with building back-end services using **Express.js** and simple **RESTful APIs**.

Learning about **error handling**, **debugging techniques**, and ways to make code more efficient.

Currently studying advanced topics such as **closures**, **scope**, **prototypes**, and **memory management** to deepen understanding.

Practicing **Git/GitHub** for version control and basic collaboration.
